

STREETS FOR ALL

New Mid-Block Crosswalk!

WHERE?

The 100 block of Bridge Street, in front of Phoenix Village.

WHY?

Safety for pedestrians! Phoenixville Borough cares about residents and wants to make living, working, and visiting downtown safe for all.

DID YOU KNOW?

Approximately 75% of pedestrian fatalities occur on a section of a road without an intersection.

We believe everyone should have safe and reliable transportation choices. A community's infrastructure should support residents of all ages and abilities to make trips by walking or cycling — because it is convenient, affordable, and promotes a healthy lifestyle.

When communities invest in sidewalks, bike lanes, trails, crosswalks, public transit, and other infrastructure it promotes transportation equity, improves public health, and reduces our carbon footprint.
